Appl. No. 10/516,450

Amdt. dated July 26, 2007

Reply to Office Action of January 26, 2007

## **Amendments to the Specification:**

Please replace paragraph [0043] with the following amended paragraph:

[0043] Relipidated tissue factor, at the indicated concentration, was mixed with factor X (100 nM), factor VIIa (100 pM) and varied concentrations of lactadherin or annexin V. The reaction was started by addition of 1.5 mM CaCl<sub>2</sub> and allowed to proceed for 5 min. at 25 °C. The reaction was stopped with EDTA and the quantity

of factor Xa formed was determined as described above for the factor Xase assay.
